YASH MAHENDRA PETHKAR

Nashik, India | yashpethkar77@gmail.com | 7774064345 | Live Project

PROFESSIONAL SUMMARY

Information Technology engineering student (graduating 2027) with hands-on expertise in Machine Learning, Data Science, and AI development. Experienced in building end-to-end ML pipelines — including data preprocessing, feature engineering, model training, and deployment — using Python, Scikit-learn, and LLM frameworks such as LangChain and the OpenAI API. Built and deployed a production-ready supply chain disruption prediction application, demonstrating the ability to deliver ML solutions from concept to real-world use. Internship experience with IBM/AICTE and Softcrowd Technologies has strengthened skills in data analysis, model evaluation, and end-to-end project delivery. Committed to applying data-driven approaches to solve large-scale business and societal challenges.

EDUCATION

B.E. Information Technology — P.V.G. College of Engineering & SS Dhamankar Institute of Technology, Nashik
Jun 2024 – Jun 2027
CGPA: 8.3

Diploma in Computer Engineering — Vivekanand Education Society's Polytechnic, Chembur
Jul 2021 – Jun 2024
85.14%

TECHNICAL SKILLS

Languages: Python, Java
ML & AI: Scikit-learn, Random Forest, LLM Integration, LangChain, Prompt Engineering, RAG, Supervised Learning, Feature Engineering, Model Evaluation
Data Science: Pandas, NumPy, EDA, Data Preprocessing, Statistical Analysis, Matplotlib, Seaborn
Frameworks & Tools: Flask, Firebase, SQL, GitHub, Jupyter Notebook, VS Code, Render

EXPERIENCE

Data Science Intern · Softcrowd Technologies · Nashik, India *Jan – Feb 2026*

- Cleaned and preprocessed structured enterprise datasets using Pandas and NumPy; performed EDA and created visualizations to surface actionable business insights.
- Trained and evaluated ML models using Random Forest and supervised learning algorithms; applied cross-validation and hyperparameter tuning to improve model performance.
- Collaborated on a full data science pipeline — from problem framing and data collection to model selection and results presentation to stakeholders.

AI & Machine Learning Intern · AICTE × BharatCares × IBM · Remote *Jan – Feb 2026*

- Completed 6-week intensive program on applied AI/ML in collaboration with AICTE, IBM and BharatCares; covered supervised learning, model evaluation, and data pipelines.
- Applied IBM AI toolkit to implement ML models on real-world datasets; strengthened foundations in probability, statistics, and linear algebra.
- Delivered hands-on projects demonstrating proficiency in end-to-end ML workflows, from raw data ingestion through trained model deployment.

PROJECTS

Supply Chain Disruption Prediction · supply-chain-ai-cpzu.onrender.com *Deployed · Render*

- Engineered a complete ML pipeline — data ingestion, cleaning, feature selection, Random Forest training, accuracy evaluation, and Flask web app deployment on Render.
- Implemented feature importance analysis to identify key disruption drivers; built an intuitive HTML/CSS prediction interface for real-time user input and output display.

Stack: Python · Pandas · NumPy · Scikit-learn · Random Forest · Flask · HTML/CSS · Render

ACHIEVEMENTS & CERTIFICATIONS

- **Open Source Connect Global (OSCG) 2026 | Contributor | Feb 2026 -** Contributed to open-source projects alongside a global developer community, strengthening collaborative development and problem-solving skills.
- Successfully completed **Google's Introduction to Generative AI** course, gaining foundational knowledge of Generative AI concepts and applications.
